

**IHI Europe Ltd. activities to limit COVID-19**

Our thoughts are with all those who have been affected by the novel coronavirus disease, COVID-19. The health and safety of our employees, customers, business partners and the societies we serve remain our top priority and we are working hard to minimize the risk of COVID-19 infections. We continue to take internal preventive and protective measures in accordance with the IHI Group's risk management and business contingency plans. These measures include remote working, restricting access to IHI Europe Ltd premises, and creating a flexible, safe working environment in consideration of social distancing and thorough personal hygiene practices.

IHI Europe Ltd. is continuously following the evolving situation related to COVID-19 and is strictly adhering to the guidelines issued by the UK national government to limit its spread. Based on government requests to limit exposure levels and support safe travel for key workers, we have made appropriate arrangements for employees to work effectively and comfortably from home, wherever possible.

While our top priority is health and safety, please be assured that we are doing everything in our power to continue to support our customer and business partners during these uncertain times. We hope that by working together, we can emerge from this challenging situation stronger.
